## 2. Executive Summary

The Culinary Medicine project has achieved a pass rate of 59.9%, with 169 out of 282 metrics meeting the required standards. This indicates that while some aspects of the project are on track, there are significant areas that require improvement.

## 3. Test Scope

- Modules Tested: Core Functionality, User Flows

## 4. Test Environment

- Environment: Multiple
- Browser: Chrome / Edge (Latest)

## 5. Test Summary

Total	Passed	Failed	Blocked	N/A	Rate
282	169	7	0	37	79.3%

## 6. Defect Summary

Critical	High	Medium	Low	Total Open
0	0	0	0	7

## 7. Detailed Defect List

---

### Defect #1: Unknown

ID: N/A | Priority: Medium

*Observation: No it doesn't work, It's showing negative value.*

---

### Defect #2: Unknown

ID: N/A | Priority: Medium

*Observation: Nope I doesn't show any error*

---

### Defect #3: Unknown

ID: N/A | Priority: Medium

*Observation: No details provided.*

---

### Defect #4: Unknown

ID: N/A | Priority: Medium

*Observation: No details provided.*

---

### Defect #5: Unknown

ID: N/A | Priority: Medium

*Observation: No details provided.*

---

### Defect #6: Unknown

ID: N/A | Priority: Medium

*Observation: No details provided.*

---

### Defect #7: Unknown

ID: N/A | Priority: Medium

*Observation: No details provided.*

---

## 8. Risks & Issues

---

The current pass rate poses a moderate to high risk to the project's overall success. The 40.1% failure rate suggests that there are substantial defects or issues that need to be addressed to ensure the project meets its intended goals and quality standards.

## 9. Recommendations & Sign-Off

---

### Key Recommendations:

Conduct a thorough review of the failed metrics to identify the root causes of the issues, Develop a corrective action plan to address the defects and improve the overall quality of the project, Implement additional testing and validation procedures to ensure that the project meets the required standards, Provide training and support to the development team to improve their skills and knowledge in areas where defects were identified

**DECISION: In conclusion, while the Culinary Medicine project has made some progress, the current pass rate is a concern and requires immediate attention. By addressing the identified issues and implementing the recommended corrective actions, the project can get back on track and achieve its intended goals and quality standards.**
