

QA Test Execution Report

QA Department

Date: 07/01/2026

Version: 1.0.0

Prepared By: QA Team

'(AI Generated

2. Executive Summary

The test execution for the Admin Dashboard run in the QA environment has been completed, covering a total of 29 test cases. The results indicate that 17 test cases passed, with no failures reported. This yields a pass rate of 58.6%, which is below the desired threshold. The lack of failed tests is a positive indicator, but the overall pass rate suggests that there are areas that require improvement to ensure the quality of the Admin Dashboard. The current quality confidence level is moderate, and it is recommended that the engineering team focuses on

optimizing and refining the application to improve its reliability and performance.

3. Test Scope

- Modules Tested: Core Functionality, User Flows
- Testing Types: Functional, Regression

4. Test Environment

- Environment: QA
- Browser: Chrome / Edge (Latest)

5. Test Summary

Total	Passed	Failed	Blocked	N/A	Rate
29	17	0	0	9	65.4%

6. Defect Summary

Critical	High	Medium	Low	Total Open
0	0	0	0	0

7. Detailed Defect List

No defects found in this run.

8. Risks & Issues

Based on the test results, the risk level is Moderate. Although there are no failed tests, the pass rate of 58.6% indicates that there may be underlying issues that need to be addressed. If the pass rate were above 95%, the risk level would be considered Low, but given the current metrics, it is essential to investigate and rectify the causes of the 12 test cases that did not pass to mitigate potential risks.

9. Recommendations & Sign-Off

Key Recommendations:

Investigate and optimize the test cases that did not pass to identify the root causes of the failures and implement necessary fixes.,Conduct a thorough review of the application's functionality and performance to identify areas that require refinement and optimization.,Develop a plan to improve the overall quality and reliability of the Admin Dashboard, including additional testing and validation.,Collaborate with the development team to prioritize and address the identified issues, ensuring that the application meets the required quality and performance standards.

DECISION: Based on the test execution results, the recommendation is NO-GO for the current version of the Admin Dashboard. While there are no failed tests, the pass rate of 58.6% indicates that further development, testing, and refinement are necessary to ensure the application meets the required quality and performance standards. It is essential to address the identified issues and conduct additional testing before considering the application ready for deployment.
